Kirei—Making Life Beautiful

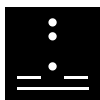

ECO SOLUTIONS FOR FERTILIZERS

SK FERT®

**Anti-caking agents
Anti-dust additives
Hydrophobic additives**

Contributing to Fertilizer industry with **Sustainable coating solutions**

In line with **Kao's ESG philosophy**, all our actions are aimed at improving our society and our planet; thus, we are committed to coming together with our partners to develop a sustainable world. The combination of our best knowledge of top-performance surfactants and expertise in fertilizer protection develops Kao's new sustainable coating range, which brings a new approach to the fertilizer industry by offering more environmentally friendly alternatives than traditional know-how.

Kao's advanced R&D laboratories have continuously supported the industry, offering top-performance additives in fertilizers while reducing coating dosage for a more efficient manufacturing process. Key parameters like anti-caking benefits, dust control, and moisture uptake reduction are carefully customized and adapted to specific fertilizer characteristics, now including sustainable choices within Kao's SK FERT fertilizer coating portfolio.

Kao's SK FERT technology now includes:

SK FERT K range	Renewable origin
SK FERT S range	Towards biodegradability & carbon footprint reduction
SK FERT OF range	Organic Fertilizer

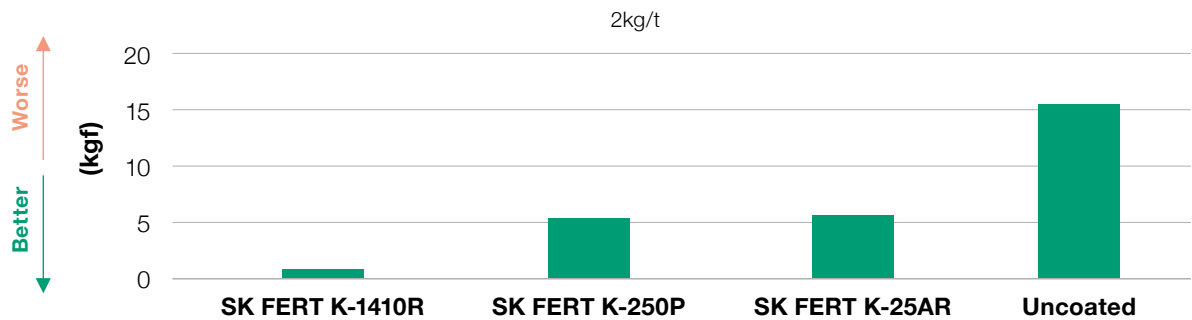

New sustainable solutions are committed to protecting a large variety of fertilizers, including the most demanded NPKs, AN, AS, CAN, Urea, MAP, DAP, TSP, among others.

Global chemical innovation

Founded in 1887 in Japan, KAO Corporation is a global leader in chemical innovation, with over 33,000 employees committed to meeting our clients needs worldwide.

Fertilizer coating additive expertise

45 years of success in the fertilizer industry

With more than 45 years of fertilizer protection experience, Kao offers anti-caking & anti-dusting additives for the excellence handling of industrial fertilizer with advanced and efficient solutions.

Tailored solutions

Adapting to your specific challenges

We develop customized solutions designed to provide free-flowing properties of each granular fertilizer through the challenges of warehousing, transport and spreading uniformly on the field, from initial evaluation to plant implementation.

Sustainability commitment

Innovation with a positive impact

Our priority is to develop products that not only enhance processes but also reduce the ecological footprint, contributing to a more sustainable environment.

Comprehensive technical support

Your success, our priority

KAO offers full technical support, from laboratory testing to on-site assistance, ensuring maximum performance and efficiency in your operations.
